

Abstract

1 An interchangeable table top arrangement has a frame and backer board that
2 can fit over a pre-existing table top or can be attached to a pedestal and used as a
3 main table top. The frame and backer board define a recess, and an
4 interchangeable insert fits into this recess. A hook-and-eye material (i.e., Velcro®)
5 or other suitable releasable attachment system hold the insert in place within the
6 frame. Finger holes in the backer board facilitate separating the attachment system
7 to change out the insert. The inserts may have designs imprinted on them, e.g.,
8 advertising, holiday theme material, or game boards.
